1. Weekly Overview

This week, I completed three additional lecture slides for the MIT Introduction to Computer Science and Programming in Python course. I also began working on a small Python project (State Capitals Project).

2. Python Learning Progress

- Completed MIT Python Lectures 5-7.
- Reviewed topics including testing, debugging, exceptions, assertions, recursion, and dictionary-related concepts.

3. Project Progress

Small Project: State Capitals Project; GitHub: <https://github.com/yjzhu131-tech/State-Capitals-Project>

- Set up the project environment and reviewed the project structure.
- Completed part of the implementation and tested the current functionality.

4. Next Steps

- Continue with the next MIT Python lectures and complete the related exercises.
- Finish the State Capitals Project.
- Begin working on the next Python project after completing the current one.
